

BUTTON 02 (SMALL)

Button 02 is a round wooden furniture knob.

It was commonly found in traditional country interiors, fitted to the drawers of tables or storage furniture.

The turning process reveals the softness of the material, the fineness of the grain, and the distinctive knots of oak and walnut.

The wood is sourced from artisans dedicated to sustainable forestry practices, coming from responsibly managed forests, agricultural plots, private cuts, or reclaimed offcuts.

Button 02 is available in two sizes: small and medium.

DIMENSIONS

L 29 mm / l 23 mm / H 23 mm

MANUFACTURING LOCATION

Normandy region, France.

MANUFACTURING PROCESS

Each Inventaire product is the result of French, manual, and artisanal craftsmanship.

MATERIAL AND TECHNIQUE

Turned wood.

Button 02 is available in walnut or oak.

This is a “living” material whose appearance may change over time when exposed to hands, air, water, or other elements. These natural changes contribute to the unique character and aesthetic of each piece.

USE

Cabinet or drawer knob. For outdoor use, please refer to the *Important Note* section.

FINISHING

The wooden knobs are protected with a balm made from beeswax and carnauba wax — a natural, bio-based product. Repeated use may diminish this protective layer, as can perspiration or humidity.

To preserve the finish of your Inventaire wooden door handles over time, we recommend regularly applying the maintenance balm made with beeswax and carnauba wax, available on our e-shop.

To enhance the product's shine, you can polish it using a soft brush or a suitable cloth.

INSTALLATION

Brass screws are provided for installing your furniture knobs. If the tightening force is not sufficient to prevent the knob from rotating, apply a drop of glue between the washer and the knob using an adhesive suitable for the materials.

IMPORTANT NOTE

For outdoor use, the protection of the handles must be adapted and renewed regularly. However, please note that their appearance will change more quickly. The dimensions of the items may vary from piece to piece within a tolerance defined by Inventaire. These variations result from handcrafting, which gives each manufacturing step its own nuances specific to the process. These variations do not affect the functionality of the products.

They give each item a unique character.
