

CANDLE HOLDER 01

Hand-forged, Chandelier 01 consists of two hammered iron rods, assembled while hot to form a tripod base and two candle supports. One features a rolled socket; the other, a clamping mechanism. The piece is shaped gradually on the anvil, as the metal is heated, struck, and drawn out to reveal its final silhouette. The manufacturing process takes several hours. Also known as a *rushlight*, this primitive lighting was widely used along the Atlantic coast, from Ireland to the Pyrenees, including England and Brittany, until the 20th century. In the past, a simple fragment of resin harvested from a tree would replace the wax candle.

DIMENSIONS

L 22 cm / H 46,5 cm

MANUFACTURING LOCATION

Occitanie region, France.

MANUFACTURING PROCESS

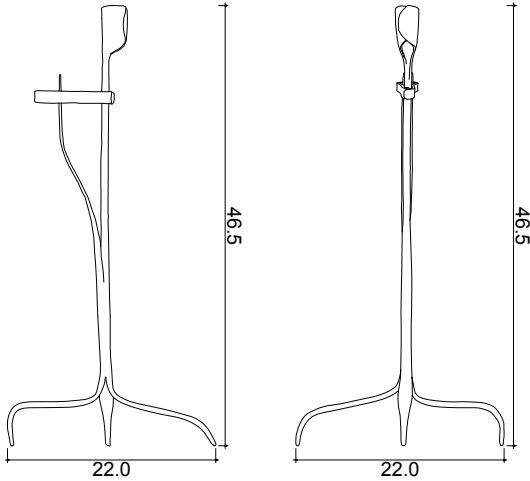

Each Inventaire product is the result of French, manual, and artisanal craftsmanship.

MATERIAL AND TECHNIQUE

Hand-forged and hammered S235 steel.
This is a "living" material whose appearance may change over time when exposed to hands, air, water, or other elements. These natural changes contribute to the unique character and aesthetic of each piece.

USE

Double Freestanding Candleholder

FINISHING

While still hot, the artisan applies a wax used for the protection and finishing of metal surfaces. The products may feel slightly tacky upon delivery. This effect will quickly disappear when exposed to ambient air. To maintain the long-term protection of your INVENTAIRE iron door handles, you can apply a natural wax yourself. If you wish to enhance the product's shine, you can polish it using a soft brush or a suitable cloth.

PRECAUTIONS FOR USE

Inventaire candle holders are single or double candle stands without wax catchers or drip trays. As a result, wax may drip onto the surface supporting the holder. To prevent wax drips from the burning candle, we recommend using high-quality taper candles. To remove wax drips from the candle holder, avoid using tools that could scratch the object.

Ensure that candle holders are placed on stable, non-slippery, horizontal surfaces.

Keep candle holders out of reach of children, especially when a candle is lit.

IMPORTANT NOTE

The dimensions of the items may vary from one piece to another within a tolerance defined by Inventaire. These variations result from handcrafted work, which introduces unique nuances at each stage of the manufacturing process. These variations do not affect the functionality of the products. They give each piece its own unique character.
