

ESCUCTHEON 01 FOR KEY (SMALL)

Keyhole Escutcheon 01 is a thin, hammered steel plate with a circular shape, designed to frame the keyhole. It was observed on the front door of an old village house in the Quercy region.

Keyhole escutcheons were richly decorated until the late 18th century, after which their design gradually became more simplified. Notably, a similar plate made of copper alloy was documented at the Dunes necropolis, a Gallo-Roman archaeological site. This rosette is available in two sizes—small and medium—and comes in two versions: with a thumb turn (used for handles or privacy lock rods) or with a keyhole.

DIMENSIONS

ø 40 mm / ép. 1,5mm

MANUFACTURING LOCATION

Normandy region, France.

MANUFACTURING PROCESS

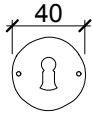

Each Inventaire product is the result of French, manual, and artisanal craftsmanship.

MATERIAL AND TECHNIQUE

Wrought iron hand-forged and hammered. This is a “living” material whose appearance may change over time when exposed to hands, air, water, or other elements. These natural changes contribute to the unique character and aesthetic of each piece.

UTILISATION

Plate to hide the lock, for key.

FINISHING

While hot, the craftsman applies a wax used for the protection and finishing of metal surfaces. It is possible that the products feel slightly sticky upon receipt. This effect will quickly disappear when exposed to ambient air. If you wish to maintain the protection of your Inventaire wrought iron door handles over time, you can apply a natural wax yourself. If you want to enhance the product's shine, you can polish it using a soft brush or a suitable cloth.

INSTALLATION

Nails are provided for installing your plates.

IMPORTANT NOTE

Please check the compatibility of the plates with your setup before placing an order. The dimensions of the objects may vary slightly from one piece to another within a tolerance defined by Inventaire. These variations are the result of handcrafting, which introduces unique nuances at each stage of production. They do not affect the functionality of the products and contribute to the unique character of each piece.
